### SKILLS & COMPETENCIES

JavaScript / TypeScript  
Python  
ReactJS / NextJS / NodeJS  
ExpressJS / NestJS  
NoSQL / MySQL / PostgreSQL  
Amazon Web Services (AWS)  
Microsoft Azure  
REST APIs  
Kafka  
Redis  
GitHub Actions  
Git  
Windows / Linux / MacOS  
Docker  
Kubernetes  
Debugging & Troubleshooting  
AI / LLM Workflow Automation  
SEO Optimization  
Software Documentation  
Application Scalability  
System Reliability  
Cross-functional Collaboration  
Problem-Solving Mindset  
Interpersonal Skills

### EDUCATION

**B.E.Sc - Mechatronics Systems Engineering**  
University of Western Ontario  
Sep 2017 - Apr 2022  
London, ON

### PROFILE

Software Developer with 4+ years of experience in JavaScript, TypeScript and Python, specializing in high-performance web applications and AI-enabled engineering workflows. Proficient in AWS and Azure cloud architectures, containerized deployments using Docker and Kubernetes, and developing robust REST APIs.

### WORK EXPERIENCE

#### Senior Software Developer | AMD

Markham, ON | January 2026 – Present

- Lead AI-enabled debug and triage workflows, architecting web tooling that routes defects to the correct component owners and speeds up resolution
- Architected and deployed a ReAct-based AI debug-automation agent as a containerized, load-balanced microservice on a dedicated production Kubernetes cluster, improving scalability and system reliability
- Re-architected inference from a per-request CPU pipeline (~30s) to a dedicated MI325X GPU service, cutting latency to <0.5s and scaling to 30 concurrent requests across 2 GPUs
- Integrated third-party debugging and regression-testing agent services into the platform via multi-stage production Dockerfiles, automated test coverage, and isolated per-service database schemas/roles with dedicated health checks to secure cross-service data

#### Software Developer II (Contract) | AMD

Markham, ON | May 2025 – December 2025

- Built AI-enabled workflows and web tools to automate debug and defect triage, routing issues to the correct component owners
- Sole maintainer of project infrastructure — built CI/CD with GitHub Actions and self-hosted runners, automated testing and health-check monitoring

#### Software Development Engineer | Curtiss-Wright Defense Solutions

Ottawa, ON | June 2022 – April 2025

- Developed and deployed production ready full-stack applications using React, Redux, React Queries and NodeJS, improving system performance and reducing load times by 20%
- Implemented CI/CD pipelines with GitHub Actions and containerized deployments with Docker and Kubernetes, reducing manual deployment time from 1 hour to 10 minutes

#### Software Technical Engineer (PEY) | Ontario Power Generation

Pickering, ON | May 2020 – August 2021

- Assisted in automating internal workflows using Python scripts, cutting down manual reporting time by 30%

### PROJECTS

#### AI SaaS 🔄

- Developed a Chat-GPT like AI SaaS that generates conversation, image, video, code and music responses using various AI models
- Utilized Azure Virtual Machines and Container Instance services for production deployment

#### E-Commerce Store 🌐 🌐 🔄 + Admin Dashboard 🌐 🔄

- Built an interconnected store and CMS web application using NextJS 14 and Shadcn/ui, enabling multi-store management and seamless content updates
- Integrated Stripe for secure payments, set up webhooks for data synchronization, and leveraged AWS S3 and RDS for scalable, high-performance data storage

### CERTIFICATIONS

#### Azure Fundamentals

Microsoft • Issued Jul 2024

#### AWS Certified Cloud Practitioner

Amazon Web Services (AWS) • Issued Mar 2024 - Expires Mar 2027
